

BUILDING FOR THE FUTURE

The Espy Foundation's Programs have been developed over the last eight years. These accomplishments have been made possible by the wonderful generosity of hundreds of individuals who believe in supporting writers, artists, and the creative process.

Recognizing that today, more than ever before, we need the wisdom and understanding of the world's writers and artists, we face the future with a renewed sense of dedication to the important work of the Foundation. We have acquired property in the Oysterville National Historic District to build cottages and an expanded library developed by noted Northwest architect George Suyama. Fundraising for the building project will be underway soon, and naming opportunities are available. These new facilities will allow the Foundation to expand the Residency Program, providing additional residencies annually. Additionally, we continue to expand our essential work in the community.

Your contribution has never been more valuable. Please give your support today, and help to ensure that the miracle of the Espy Foundation lives on into the future.

Yes, I want to invest in the future of the arts by supporting the Espy Foundation!
